

1922.

WESTERN AUSTRALIA.

# Quarterly Statistical Abstract

(The preliminary figures published in this Abstract are, as far as possible, revised every quarter. Those which appear in this issue consequently supersede any contained in previous issues.)

No. 224.

To 31st December, 1921.

Compiled from Official Returns.

S. BENNETT, F.I.A.,  
Government Statistician.

PERTH:

BY AUTHORITY: FRED. WM. SIMPSON, GOVERNMENT PRINTER.

1922.

Horse-driver ( <i>see Carter</i> ).	do.	48	4 16 0
Jeweller	do.	...	...

\* It should be carefully noted that each award applies only to some particular area. The rates of wages payable on the goldfields may not be, in a few instances, fixed by any award, but the ruling rates are, for the most part, higher than those payable in coastal districts for similar occupations. In some cases private agreements, which are not yet filed at the Court, have been quoted from.

† Lowest rate paid.

‡ With board and lodging.

*a.* Newspaper rates provided for in separate agreement, including Composing, Stereotype, and Machine Room Workers.

*b.* Special hours.

No. 41.—Minimum\* Rates of Wages fixed by Agreements and Awards under the Industrial Arbitration<sup>u</sup> Act—continued.

## XV.—METEOROLOGICAL STATISTICS.

### No. 42.—Notes on the Rainfall of Western Australia for October, November, and December, and the Year, 1921.

*October*.—The most notable feature of the October rainfall was the good agricultural downpour registered on the 13th of the month. This visitation greatly improved the harvest prospects, and dispelled the anxiety which had been slowly growing since September 17th, when the previous good general rain was recorded over the wheat belt.

In the South-West quarter of the State, the disturbance of the 13th was responsible for the bulk of the month's rain. On the coast, however, showers occurred on several other dates, but only reached a few of the inland localities. On the 27th, however, a depression formed in the North, and rains set in over the Gascoyne and extended rapidly to all subtropical areas. The gaugings were of a somewhat patchy nature, being heaviest on the goldfields, where they constituted practically the total fall for the month. They were, however, fair to moderate in most of the wheat-growing districts, and, generally speaking, of considerable agricultural value, although marred over one or two restricted areas by hailstorms, which damaged some of the crops.

Compared with the averages for October of previous years, the month under review was wetter than usual over the greater part of the coastal and agricultural areas, while a large tract of the interior, embracing the Central and Eastern portions of the Murchison, and the North Coolgardie Goldfields, also received more than the normal amount. Otherwise sub-tropical districts showed a slight defect, which intruded into some of the Northern portions of the wheat belt. In the tropics a few isolated thunderstorms fell, but as October is, as a rule, an absolutely dry month in the North, these trivial registrations were sufficient to account for small excesses above normal.

*November*.—The November rainfall map, on the whole, revealed totals of a light character, and in most instances deficiencies below the normal were recorded. South-West coastal districts, and many of the stations in Southern agricultural areas, however, showed total gaugings somewhat in excess of the usual figure for the month. The rainfall throughout these areas occurred chiefly in connection with two well-defined depressions, the first during the opening week and the second between the 12th and 18th. As usual, the coastal areas received the bulk of the falls, and the only days on which showers of at all a general character reached the agricultural districts were the 4th, and, to a lesser extent, the 13th and 17th. Several minor depressions also affected the weather during the month, but in each case their passage was associated only with light scattered showers.

The South Coolgardie Goldfields were visited by thunderstorms on the 22nd and 25th, and, as a result, some of the stations showed excesses; but the Northern and Murchison Fields, together with the greater part of the Tropics, experienced a practically rainless month. Some thunderstorms, however, fell in the Kimberley and inland North-West, but Wyndham and Marble Bar were the only stations to record small excesses.

*December*.—The December rainfall over sub-tropical portions of the State was mainly accounted for by the frequency of thunderstorms associated with tropical low pressure systems. The only extensive falls occurred on the 8th and 14th, when a large area of the wheat belt and Coolgardie Goldfields was affected. Apart from these two dates no downpour of any importance was registered during the month, but thunderstorms were of almost daily occurrence at one portion or another of the State.

At the majority of stations the average for the month was exceeded, but, beyond some isolated instances, large departures were confined to the South Coast. Over a considerable portion of the Midland country, and parts of the North Coolgardie and Murchison Goldfields, small deficiencies were shown.

Turning to the Tropics, a very much less satisfactory state of affairs was revealed. From Broome Westward and Southward very little rain at all was recorded, while throughout the remainder of the Kimberley districts a serious shortage was indicated. Over these areas the month's totals amounted to less than half the normal amount, the falls ranging from 1.67 inches at Hall's Creek to 2.76 inches at Wyndham, as against averages varying between 3 and 6 inches.

---

*Year 1921*.—Four cardinal features stood out in connection with the rainfall distribution for the year 1921. These were—(1), the total failure of tropical rains in January; (2), the heavy "Willy Willy" downpour of the third week in February; (3), the phenomenally heavy rains of early winter, which made May, 1921, the wettest May on record, at least since 1877, and (4), the occurrence of good agricultural rains toward the close of the wheat-growing season. To a very large extent the year's totals in the various districts were accounted for by one or more of the three first-mentioned factors, while the fourth was of vital importance to the success of the harvest.

## XV.—METEOROLOGICAL STATISTICS—*continued.*

A glance at the rain map for the year showed that deficiencies were experienced in the Kimberley divisions and Northern Murchison, together with a few other localities, and excesses over the remainder of the State. The shortage was most pronounced in the neighbourhood of Derby, the total at that station falling 11·28 inches below the average, while the greatest excesses were met with at various centres along the North-West, West, and South-West Coasts (*e.g.*, Roebourne, Onslow, Shark Bay, three stations near Geraldton, and several between Fremantle and the Leeuwin exceeded the normal by amounts varying from 10 inches, to 16·42 inches at Fremantle Signal Station).

The defect in the Kimberley was mainly due to the dry January, good February and March falls failing to make up the leeway. The concluding months of the year were also disappointing.

Heavy totals in the North-West and West Gascoyne were explained by the February “Willy Willy,” and the heavy May rains, which extended to Northern areas in the latter half of the month, and lasted into early June. In fact, the only portion of the State entirely unaffected was East Kimberley. March was also a fairly good month over these regions, and some useful rains occurred in late July and early August.

Another important outcome of the May rains was the breaking of the drought in the Murchisons, which, for practical purposes, had lasted in many districts since February, 1918. Although rain was not entirely absent, the monthly means being even exceeded occasionally, it fell in the form of light, isolated showers, and was of little value in view of the parched condition of the country. A good downpour on the 12th May reached the greater part of the division, and was followed by frequent showers during the ensuing four weeks. The remainder of the year was, however, very dry, save for two moderately good falls in August. From Nannine Northward deficiencies were noted on the annual totals; elsewhere the averages were surpassed by fairly substantial amounts.

Over the Coolgardie Goldfields from 50 to 75 per cent. of the year's rain fell between May 7th and June 14th. Apart from this period some partial monthly excesses were noted, but no general rains of importance occurred.

Turning to the South-West division, and speaking more particularly of the agricultural areas, the early months were dry, save for two partial summer rains. The May downpour commenced with the month, and lasted almost continuously until mid-June. Then followed a seventeen day interval, broken only by a few showers, and June closed with aggregate falls rather below normal. Wet weather returned with July, and lasted until 21st August, but the falls, though frequent, were light, and both months recorded decidedly lighter totals than usual. A period of fine weather, clear skies, and Easterly winds now set in, and anxiety lest the winter rains had suddenly ended was expressed in many quarters, but this was terminated by fine agricultural rains on September 5th and 7th. Another general fall occurred on the 17th, but was followed by a second lengthy dry spell. On October 13th good rains again swept through the wheat belt, and frequent showers lasting until early November brought the wheat-growing rains to a close. In December, however, thundery rains, with some heavy falls and an occasional hailstorm occurred on various dates.

Taking the year as a whole, the agricultural areas fared well, and, despite the fact that several localities recorded deficiencies, the year's totals were nowhere inadequate. The rainfall distribution was not ideal, but on the other hand it was in no particular seriously defective. The early months were too dry, and involved water-supply difficulties. The heavy May rainfall caught farmers unprepared. Ploughing and cropping operations were not completed, and their resumption when the rains eased off in mid-June was not everywhere opportune, with the result that the acreage sown was not up to expectation. On the other hand the downpour gave the season an excellent start, and the relative warmth of the winter months favoured vigorous plant growth. The dry spells of late winter and autumn occasioned much anxiety, and no doubt somewhat reduced the yield, but probably also checked a possible tendency for the development of rust and other diseases. The importance of the rains of September 7th and 17th, and October 13th, rested in their opportune occurrence, rather than in the volume of the actual falls. Hail in December was destructive in a few isolated localities, but, taking the whole harvest into consideration, the damage was almost negligible.

## XVII.—LOCAL OPTION VOTE, 30th April, 1921.

No. 46.—Results for the whole State of Local Option Poll taken under the provisions of “The Licensing Act, 1911.”

Resolutions A, B, C, and D :—A, that the number of licenses existing in the district continue; B, that they be increased; C, that they be reduced; D, that no licenses be granted or renewed in the district.

Electors in State.	Males.	Females.	Total.	Valid Votes.	For A.	For B.	For C.	For D.	Total.
Enrolled, 30th Apr., 1921	92,196	77,320	169,516	Recorded ...	37,710	2,165	6,940	31,302	78,117
Ballot Papers issued ...	48,436	36,707	85,143	Aggregate ...	39,875		38,242		

Result: Resolution A carried in 32 Licensing Districts by a total of 6,401 votes.  
Resolution C in 10 Licensing Districts by a total of 4,768 votes.

On the two questions—(1) Whether new Publicans' General Licenses were to be held by the State, and (2) Whether State Management should obtain throughout districts, the voting resulted as follows:—(1) 28 districts voted “Yes” with an aggregate majority of 6,452 votes, 14 voted “No” with an aggregate majority of 675 votes; (2) 23 districts voted “Yes” with an aggregate majority of 5,110 votes, 19 voted “No” with an aggregate majority of 1,133.
